

AMAZING ANIMALS

Mini Chapter -1
Animal classifications

WHERE IS MY
HONEY???

OMNIVORES

Black bears, polar bears, and grizzly bears are members of the carnivora order, but they are omnivores. Most of the black bear's diet consists of plants. In the summer months, it eats grasses, herbs, sedges, fruits, berries, and nuts. It also eats insects.

CARNIVORES

carnivore mostly eats meat, or the flesh of other animals. carnivores are Sometimes also called *predators*. Carnivores are an Important part of the food chain.

Prey is an animal taken by a predator as food.

ROAR!!!!

HERBIVORES

Herbivores depend on plants for their survival, hence it is important for humans to protect forests & fields, to ensure herbivores have enough to eat.

Cutting trees, destroying forests can have a huge impact on the environment.

MOO!
WANT SOME
MILK!!!?
